# Hunkeler's presence at IPEX

**hunkeler** Hall 19, stand C710  
RIP

## **World first with Double Plow Folder PF7**

Technology study for book signatures and mailing production for web widths of up to 30 inches.

New

**hunkeler** Hall 19, stand C710  
RIP

## **Dynamic punch and perf solution DP6**

New dynamic perforation and punching module DP6 highly dynamic processing with three dynamic functions.

New

**RICOH** | **IBM** Hall 12, stand D130

InfoPrint Solutions Company

## **New compact inline web processor PP6**

Roll to fan-fold production line with PP6 and Web Inspection WI6 (fold and length perforation, tractor feed hole punching).

New

**Horizon** Hall 20, stand C650

## **High speed mailing production**

Full bleed mailing production at 180 m/min. Simple conversion from plow fold to slit-merge.

**Horizon** Hall 20, stand C650

## **Brochures on demand solution**

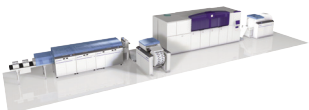

Variable page brochure production with up to 6000 stitched and cut copies per hour from roll to finished brochure.

**xerox** Hall 7, stand CD450

## **Roll to stack / roll to roll combi-line**

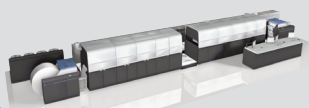

Finishing system for coloured transpromo and mailing applications.

**Kodak** Hall 9, stand E320

## **High performance POPP7 line**

Roll to roll system with a 26 inch paper web (660 mm) running at a production speed of 200 m/min.

Hall 17, stand D900

### Roll to roll solution

Roll to roll with tension modules.

Hall 19, stand C790

Hall 18, stand D840

### Inserting systems

Roll feeding with Hunkeler unwinder.

● Hunkeler main stand 19-C710

Hall 10, stand C290

### Print on demand with roll to roll solution

Full colour ink jet POD application with tight web unwinder and rewinder.

Hall 10, stand C290

### Single engine duplex with narrow web

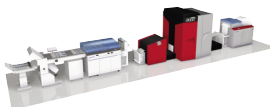

Full colour ink jet printing with register adjustment on the first printed copy and automatic elimination of unprinted sheets.

Hall 11, stand C230

### Full bleed mailing production

Full colour mailing from roll to finish folded product. Rotary chip-out on the high performance cutter CS6-II.

Hall 11, stand C200

### Economical roll to sheet line

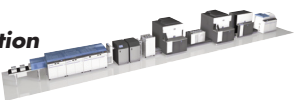

Production of personalized print products in the 2-up mode with CS6-I and shingle delivery.

Hall 12, stand AB150

### Roll to stack line with inline lamination

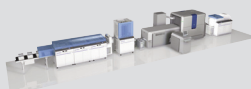

Production line for photobook applications and book covers in the top quality range.

Hall 12, stand B150

### Dynamic roll to stack line

Inline processing with cross and longitudinal cutting, sheet separation, offsetting and high performance stacking.

# innovationdays 2011

February 14 to 17, 2011  
Lucerne, Switzerland

**The unique industries event worldwide**

*Innovationdays 2011 will be opening its doors in Lucerne between February 14 and 17, 2011. Along with over 70 partners, we will again offer you innovative paper processing solutions at the new exhibition center in Lucerne. Innovationdays is the industry's paper processing event par excellence. This show is seen as an essential information and communications platform in professional circles the world over. The participation of leading digital printing system manufacturers and well-known suppliers from the finishing, consumables and IT sectors under one roof is unique. It's a scenario that allows integrated solutions to be showcased in a way that relates closely to industry practice.*
