Training Program

Imparting Knowledge

Hunkeler systems operate at peak efficiency to ensure consistently high throughput. It is this peak efficiency that makes our systems highly reliable and therefore highly profitable. One reason for our success is the perfect planning and organization of necessary service and support. With a training program that is divided into individual modules, Hunkeler can provide customized technical support that is precisely adapted to the requirements of each of our customers. Our training team invests their many years of experience into every class given by Hunkeler. Modern training methods, training aids and the most up-to-date infrastructure offer the best possible basis for efficient training. The continuing education of our instructors ensures that the latest know-how in the industry will be presented in a clear and concise manner.

An investment that pays off

For the competence of your personnel

With its technical equipment and modern rooms for learning theory, our spaciouly designed Training Center provides the ideal setting for comprehensive, rock solid training. Behind the technology is our training team, whose many years of accumulated experience guarantees professional instruction. The knowledge about Hunkeler systems that is transferred in Wikon can be supplemented and deepened at any time at your location if needed. An end-of-course test and the awarding of a certificate upon completion of the training course is your guarantee that your personnel have acquired the necessary knowledge in theory and practice for the successful operation of Hunkeler production systems.

Location-independent training

The methodology of the instruction concept permits us to offer courses at your location on site or in the spacious surroundings dedicated to learning theory and practice at Hunkeler's headquarters in Wikon. We offer you the following services in Wikon:

- Spacious training areas with various production lines
- Separate, modern training rooms
- Simulation boards for troubleshooting
- A diversity of learning aids
- Documentation in electronic form
- Catering for all course participants

Conditions for on-site training:

- No production during training
- Provision of rooms for theory instruction
- Participants are released from work responsibilities during the course

Our training team ensures your success

Our experienced instructors, all of whom have many years of customer service experience in the field, instruct a diversity of participants every year in the theoretical as well as practical aspects of Hunkeler machines. It goes without saying that our courses are offered in various languages.

Helge Zumbach
Instructor
at Hunkeler
since 2007

Antonio Iemmola
Electrical instructor
at Hunkeler
since 1990

Marc Gerhard
Electrical instructor
at Hunkeler
since 1997

André Stocker
Electrical instructor
at Hunkeler
since 1997

Needs-oriented instruction concept

Key components of our service

Training is of utmost importance at Hunkeler: We are convinced that investing in technical equipment is justified only if the operating personnel are well acquainted with the means of production. This is why we have invested substantial know-how and personnel as well as financially in our Training Center.

Operation or maintenance

The modular instruction concept consists of various modular courses and various training levels. A distinction is always made between operating and technical personnel. Technical training is needs-driven at different levels.

Objectives of our training courses

- To accommodate needs-driven training through modularly designed courses and to utilize the areas of expertise of the teaching staff
- To provide insight into technical thinking and action by imparting technical qualifications
- To enable participants to take theoretical knowledge and apply it practically and to carry out job orders according to instructions
- To provide qualified engineers for Hunkeler machines in order to offer top service to the customer
- To increase the availability of the system through targeted training
- To target specific technical training to be able to offer the customer optimal value and competence transfer

Operator course (Operator personnel)

Train your operating personnel. Efficient operation and optimized production settings are taught intensively so that your Hunkeler systems achieve greater availability and produce even better quality products. Standstill times due to incorrect operation are eliminated. Your operating personnel will become more competent and better motivated thanks to our training.

The course participants take an end-of-course test and are awarded a certificate.

Operator training is tailored to meet customer needs and can be carried out on site.

Contents

- Learn the basic functions of the modules
- Parameters for operating personnel
- Understand and use display logic
- Cleaning work
- Instruction materials and lunch

Goals

- Error-free operation
- Fault detection
- Operator certificate

Training location

- At the Hunkeler Training Center, Wikon (Switzerland)
- On-site (see note "Location-independent training")

Example

Example of a Roll-to-Stack course:

Unwind module UW6	1.0 Day
Crosscutting module CS6	1.0 Day
Separation unit SE6	0.5 Day
Stacking module LS6	0.5 Day
TOTAL	3.0 Days
