

# Regional Technical Specialist RTS

## Technical trainings

Having service technicians carry out measures that maintain the value of the systems benefits you by letting your better focus on developing your core business while at the same time ensuring system availability. For us, early detection and correction of potential faults means preventing real problems before they happen. On-going service of your Hunkeler machines at the RTS level maintains systems at their very best operational condition and ensures long life and profitable re-sale. This service, which meets the highest standards, is performed by qualified RTS specialists. A refresher or update course is recommended every two years.
